

BAC Swim Meets protocol

We remain a "masked" facility as we have programming throughout our building, (Atlantic Health Systems and Sproutlings are tenants,) as well as members who only recently became eligible for vaccines and boosters.

We also ask that teams maintain social distance; enforcement and adherence is the responsibility of each team.

Spectators are not permitted.

Our building remains "closed" negating the use of the main entrance.

Teams and officials are to enter directly into the Natatorium. To further promote the protection of teams utilizing our facility, separate entrances will be used by each team.:

Officials will enter through the rear of our building,
NP will enter from the entrance along Central Avenue and

Visiting teams will enter from the parking lot closest to the pool.

Teams are not to bring food into the facility and are to leave with anything they might have brought in.

Locker rooms remain closed and insurance negates "deck changing." We have two port-o-johns located behind our facility. Teams will have to enter the facility "race-ready."

For dual meet competitions, our thoughts are to keep teams separated.

For racing, one team will compete in lanes 1,2,3, with lane 4 "open" and the other team will compete in lanes 5,6,7.
